

Total layout control... and more.

Topcon Layout [for the field]

Topcon Layout gives contractors the tools they need to accurately and quickly lay out projects... and more.

- Multipurpose – Layout buildings, foundations, pipelines, cable runs and more.
- Easy to use interface and operation designed for contractors.
- Flexible data input – Enter manually from plan or import from your desktop.
- Great for grade checking, topo, even as-builts.
- Supports conventional and robotic total stations.

LayoutMaster [for the office]

Prep projects on your desktop by importing CAD drawings or simply input data from the plans then transfer your project directly to Topcon Layout for the field.

Seamless integration with Topcon total stations
